

Service description for Internet Professional "Public IP" 20 Mbit/s dedicated:

Access to the Internet is provided over a high-speed data network (gigabit network) available at Messe Wien and a high-performance, redundant connection to two different providers.

With "Internet Professional "Public IP" 20 Mbit/s dedicated" you receive an Internet connection with a bandwidth of 20 Mbit/s in both directions as well as a public IP address to be reached from the Internet.

Provisioning at the booth takes place via a shielded CAT-5 data cable with standard RJ45 plug, the public IP address as well as PPPoE access data are sent in advance.

If necessary, a PPPoE-capable router with integrated 4-port switch will be provided at no charge.

Included is the infrastructure, availability check for the connections, planning and laying of the line in coordination with the booth builder or, if necessary, with the trade fair operator, functional check after completion as well as a technical hotline during the event and during the set-up and break-down times.

Setup: Connect the network cable to the PC or router. Connect via PPPoE and surf away.

You can also buy this product.
