

Service description for “additional public IP address”:

Access to the Internet is provided over a high-speed data network (gigabit network) available at Messe Wien and a high-performance, redundant connection to two different providers.

Included is the infrastructure, availability check for the connections, planning and laying of the line in coordination with the booth builder or, if necessary, with the trade fair operator, functional check after completion as well as a technical hotline during the event and during the set-up and break-down times.

IMPORTANT:

Only available in combination with Internet Professional "Public IP" dedicated.
